

MICRONPC.COM AND HEWLETT-PACKARD ALLIANCE SOLVES ALL YOUR SERVER NEEDS...

Micron Government Systems, Inc. and industry leader Hewlett-Packard have formed an alliance to bring you the ultimate direct-delivery server connection. By offering Hewlett-Packard's quality NetServer® line through our direct channel, you get a single point of contact for all your server needs. Customized server solutions smart enough to tackle your immediate needs head-on and flexible enough to grow with your evolving enterprise. It's one of those win-win situations: powerful HP server technology backed by the unparalleled service, support, and direct-sales flexibility of Micron Government Computer Systems, Inc.

HP NETSERVER® LC 2000

Solid workgroup server for basic computing with dual Intel® Pentium® III processors, fast 133MHz front side bus, 4GB RAM capacity, six hot-swap drive bays, and six PCI slots. Rack mountable with tool-free access and redundant systems for easy serviceability.

HP NETSERVER LPr

Low profile, high-density server packed into a 2U form factor with dual Intel Pentium III processors, 1GB RAM capacity, two hot-swap drive bays, and four PCI slots. Great for Web server applications. A fully functional, scalable, high-density workgroup server.

HP NETSERVER LH 6000

A workgroup powerhouse. Up to six Intel Pentium III Xeon 550MHz or 700MHz processors, integrated NetRAID controller, 12 hot-swap drive bays, and eight PCI slots delivering 64-bit processing. Ideal for high-traffic data protection.

HP RACK STORAGE/12

External storage with multiple terabytes of storage in either SCSI or fiber channel configurations. Supports up to 12 low-profile or eight halfheight Ultra 3 hard drives. Extremely scalable and easy to upgrade.
