

Notes:

1. Check where underground services are before digging.
2. All measurements are approximate.
3. Once bed is dug, bed should be edged to contain garden. I would suggest black plastic edging.
4. Amend existing soil. Mix well.

Frontyard - Design Layout

Notes:

Once design has been laid out:

1. Lay weed membrane below River Rock and Pea Stone.
2. Lay all rock surfaces.
3. Build bridges and place according to plan.
4. Lay stepping stones.

Frontyard - Hardscaping

Notes:

1. All plants are shown at full size. Remember to leave space around plant for growth.
2. When purchasing plants, inquire about a warranty. It is recommended to purchase all your plants at a nursery for the best warranty. Also ask nursery about winter protection. Some plants are only available in the appropriate planting season - spring or fall.
3. Layout bed. Dig bed.
4. Edge bed with black plastic edging.
5. Amend soil. Be sure to mix well with existing.
6. Plant Perennial/shrubs according to plant instructions.
7. After planting, cover exposed ground in a thick layer of mulch, to help retain moisture and keep the weed population down.
8. If you plant during July and August, be sure to water everyday to establish roots.
9. Bulbs can be added at owners discretion.
