

# list markup

## Activity #6

adding lists to the ACME Widgets web page

In this assignment, you will add two kinds of lists to the Web page you've been building during this course.

converting text to a bulleted list

---

1. Open the file widgets\_3.html and save it as widgets\_4.html.
2. In the paragraph immediately following the "Order Your Widgets Today" heading, move the closing paragraph tag to just after the colon (replacing the `<br>` tag).
3. Use the unordered list tags (`<ul> . . . </ul>` and `<li> . . . </li>`) to make each of the different ways to order widgets an item in a bulleted list. Remove any line break tags within the list.
4. Save your changes to the document.
5. Launch your Web browser and open webdocs/widgets\_4.html to view your document. Your display should be similar to the one in Figure 6-11.

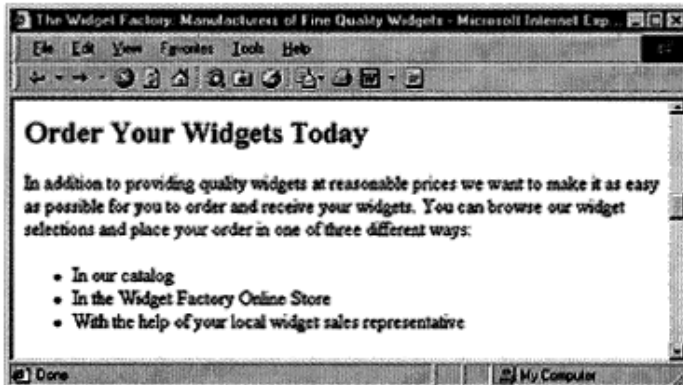

Figure 6-11: Use unordered list markup to convert plain text to a bulleted list.

adding bulleted lists

---

1. Add the following text immediately after the "Catalog Shcpping" heading and mark it as a paragraph:  
  
To order a widget catalog send an e-mail message to [catalog@widget-factory.com](mailto:catalog@widget-factory.com) that includes:  
  
2. Make the e-mail address "[catalog@widget-factory.com](mailto:catalog@widget-factory.com)" an e-mail hyperlink that sends e-mail

to the address [catalog@widget-factory.com](mailto:catalog@widget-factory.com).

3. Add the following text as a bulleted list immediately following the previous paragraph:

Your name Your organization Your street address Your city, state, and zip code An e-mail address so we can confirm that your catalog is on the way

4. Add the following text immediately after the "Meet Your Local Sales Representative" heading and mark it as a paragraph:

A sales representative is available in your area to provide you with personalized service. Sales representatives have information on volume discounts, can help you set up credit terms, and can arrange regular shipments of widgets based on your needs. If you would like to work with a sales representative send an e-mail message to [sales@widget-factory.com](mailto:sales@widget-factory.com) that includes:

5. Make the e-mail address "[sales@widget-factory.com](mailto:sales@widget-factory.com)" an e-mail hyperlink that sends a message to the address [sales@widget-factory.com](mailto:sales@widget-factory.com).
6. Add the following text as a bulleted list immediately following the previous paragraph:

Your name Your organization Your city and state Your phone number Your e-mail address

7. Save your changes to the document.
8. Launch your Web browser and open `webdocs/widgets_4.html` to view your document. A browser should display your new lists in a way similar to the ones in Figures 6-12 and 6-13.

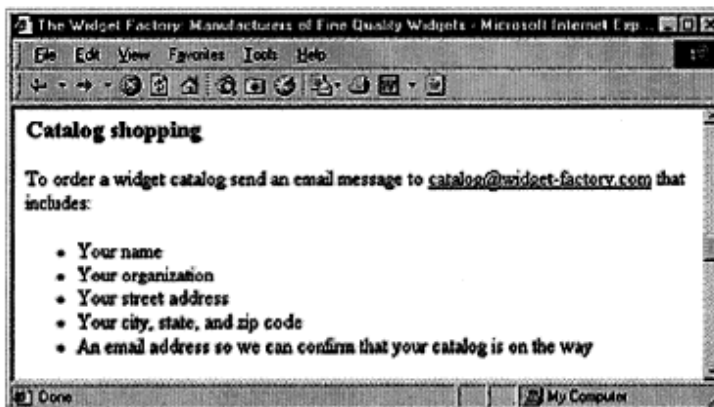

Figure 6-12: An unordered list groups similar information, in this case the user's mailing information for ordering a catalog.

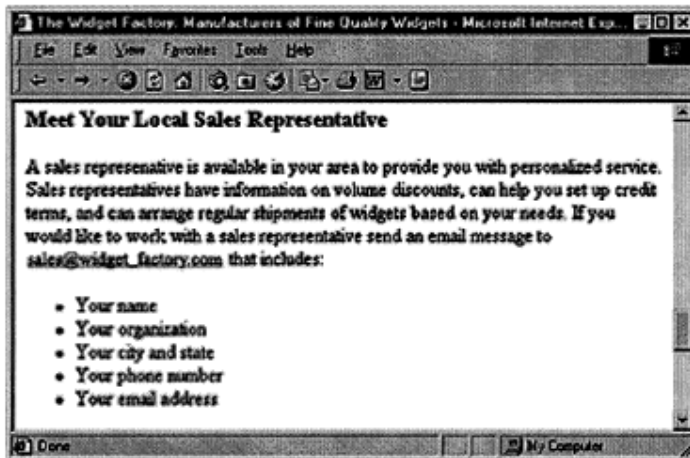

Figure 6-13: This unordered list groups information related to getting in touch with a sales representative.

#### TIP

For fun try to change the bullet style of any of these bulleted lists to square or disc.

adding a definition list

---

1. Remove the entire paragraph containing e-mail contact information that follows the "Contact Us" heading.
2. Add the following text immediately after the "Contact Us" heading and mark it as a paragraph:

The Widget Factory is located in sunny Anchorage, Alaska. You can contact us in one of several ways:

3. Use the `<dl> . . . </dl>` tags to create an empty definition list immediately following the new paragraph.
4. Use the definition term tag (`<dt> . . . </dt>`) to add the following term to the list:

By phone:

5. Use the definition description tag (`<dd> . . . </dd>`) to add the following description to the list:

1-800-WIDGETS

6. Add two line break tags after the definition description.
7. Add the following term to the list:

By postal mail:

8. Add the following description to the list (use line break tags to separate each line of the address):

The Widget Factory 11111 Winter Way Anchorage, Alaska 00000

9. Add two line break tags after the definition description.
10. Add the following term to the list:

By e-mail:

11. Add the following description to the list:

info@widget-factory.com

12. Make the e-mail address "info@widget-factory.com" an e-mail hyperlink that sends e-mail to the address info@widget-factory.com.
13. Save your changes to the document.
14. Launch your Web browser and open webdocs/widgets\_4.html to view your document. A browser should display your new lists in a way similar to the one in Figure 6-14.

Figure 6-14: This definition list groups different kinds of company contact information.
